Python Style Guide

Readability counts. This is an important point in the zen of Python.

Code is read much more often than it is written. PEP8, is a document that provides guidelines to improve the readability of code and make it consistent across the wide spectrum of Python code.

Here are the most important points extracted for you:

- Prefer Spaces no tabs for indentation.

- Use 4 spaces per indentation level.

- Wrap lines so that they don't exceed 79 characters.

- Use blank lines to separate functions and classes, and larger blocks of code inside functions.

- Put comments on a line of their own.

- Use docstrings.

- Use spaces around operators and after commas.

- Name your functions and methods using `lower_case_with_underscores`.

- Name your classes using `CamelCase`.

- Name your constants in all capital letters with underscores separating words, like `MAX_FILE_UPLOAD_SIZE`, YEAR.
